### USA PATRIOT ACT (This notice is printed in compliance with Section 326 of the USA Patriot Act)

#### IMPORTANT INFORMATION ABOUT PROCEDURES FOR APPLYING FOR AN INSURANCE POLICY OR ANNUITY CONTRACT

To help the government fight the funding of terrorism and money laundering activities, federal law requires all financial institutions, including insurance companies, to obtain, verify, and record information that identifies each person who opens an account, including an application for an insurance policy or annuity contract. What this means for you: When you apply for an insurance policy or annuity contract, we will ask for your name, address, date of birth, and other information that will allow us to identify you. We may also ask to see your driver's license or other identifying documents.

## ➡ 9 Acknowledgments and Signature(s)

### 9(a) Replacement

- Yes**  **No** Do you have any existing life insurance or annuity contracts? (*Must check either Yes or No.*)
- Yes**  **No** Is the purchase of this annuity intended to replace, terminate, or change the value of any existing life insurance policies or annuity contracts? (*Must check either Yes or No.*)

Provide the replacement information on the required forms, which can be obtained from your licensed agent and include them with this application.

### 9(b) Acknowledgements of Owner(s)

I represent that all statements and information provided herein are true and complete to the best of my belief and knowledge. I understand that the application will be attached to and made a part of the annuity contract. By signing below, I declare the following:

- I have consulted with my licensed agent and received and read the applicable product disclosure in the Owner Acknowledgment and Disclosure Statement and any other related materials such as illustrations, which describe various product features, including but not limited to: (a) withdrawals; (b) withdrawal charges; (c) withdrawal charge schedule; (d) early withdrawal tax penalty; (e) start of an income plan; and (f) guaranteed lifetime withdrawal benefit.
- I have received the *Buyer's Guide for Deferred Annuities*.
- I understand that I am purchasing an index annuity. I also understand that although the annuity values may be affected by an index, the contract does not directly participate in any stock or equity investments. In the event of changes in index values, no interest will be credited to the index account until the end of an Index Term, subject to applicable rates which may be zero.
- I understand and acknowledge that The United States Life Insurance Company in the City of New York does not offer legal or tax advice and I have had the opportunity to seek such advice from the proper sources before purchasing this annuity.
- If I am funding a tax-qualified retirement plan with this annuity, I understand that (1) there may be more robust insurance benefits offered in other annuities and (2) the annuity does not provide any additional tax deferral treatment beyond that which I already have under my plan.
- If I am funding a tax-qualified retirement plan with this annuity, I understand that the living benefit, if elected, may have limited usefulness with my contract because partial withdrawal(s) taken to satisfy the required minimum distributions prior to the Activation Date might result in a proportional reduction in the Guaranteed Lifetime Income Amount or an inability to exercise the benefit altogether. If I plan to activate Withdrawals of the Guaranteed Lifetime Income Amount after my required minimum distribution beginning date under the contract, I will consider whether the benefit is appropriate for my circumstances. I will consult my tax advisor.
- My answers are representations and not warranties, and are true and correct to the best of my knowledge and belief.

Index annuities are not a direct investment in the stock market. They are long-term insurance products with guarantees backed by the claims-paying ability of the issuing insurance company. They provide the potential for interest to be credited based in part on the performance of the specified index, without the risk of loss of premium due to market downturns or fluctuations. Index annuities may not be appropriate for all individuals. Withdrawals may be subject to withdrawal charges. Withdrawals may also be subject to federal and/or state income taxes. An additional 10% federal tax may apply if individuals make withdrawals or surrender their annuity before age 59½.

The Lifetime Income Builder guaranteed living benefit (GLB) rider is available only with the Power Index Premier NY Index Annuity for no annual fee. The Guaranteed Lifetime Income Amount (GLIA) is the maximum amount that may be withdrawn each contract year under Lifetime Income Builder. It is calculated by multiplying the income percentage at the time of activation (when lifetime withdrawals begin) by the greater of the contract value or the Minimum Accumulation Value, which is equal to the premium accumulated at a minimum of 1% per year (adjusted for any withdrawals or applicable withdrawal charges). The income percentage is not a rate of return and is not added to the contract value.

Individuals can also receive lifetime income through annuitization, a process that permanently converts the annuity contract into income payments. Once you annuitize a contract, you will no longer have access to your principal. For more information about the GLB rider or annuitization, please see the Owner Acknowledgment and Disclosure Statement.

All contract and optional benefit guarantees, including any fixed account crediting rates or annuity rates, are backed by the claims-paying ability of the issuing insurance company. They are not obligations of or backed by the distributor, insurance agency or any affiliates of those entities and none makes any representations or guarantees regarding the claims-paying ability of the issuing insurance company.

**DEPARTMENT OF FINANCIAL SERVICES OF THE STATE OF NEW YORK**  
**IMPORTANT NOTICE REGARDING REPLACEMENT OR CHANGE OF LIFE INSURANCE POLICIES**  
**OR ANNUITY CONTRACTS**

**THIS NOTICE IS FOR YOUR BENEFIT AND REQUIRED BY 11 NYCRR PART 51 (INSURANCE REGULATION 60)**

YOU ARE CONTEMPLATING THE PURCHASE OF A LIFE INSURANCE POLICY OR ANNUITY CONTRACT IN CONNECTION WITH THE SURRENDER, LAPSE OR CHANGE OF EXISTING LIFE INSURANCE POLICIES OR ANNUITY CONTRACTS. THE AGENT OR BROKER IS REQUIRED TO GIVE YOU THIS NOTICE. A SIGNED DISCLOSURE STATEMENT WILL ALSO BE PROVIDED TO YOU CONTAINING THE SUMMARY RESULT COMPARISON FOR THE NEW LIFE INSURANCE POLICY OR ANNUITY CONTRACT AND ANY LIFE INSURANCE POLICIES OR ANNUITY CONTRACTS TO BE CHANGED THAT SETS FORTH THE FACTS OF THE TRANSACTION AND ITS ADVANTAGES AND DISADVANTAGES TO YOU. YOUR DECISION COULD BE A GOOD ONE – OR A MISTAKE – SO MAKE SURE YOU UNDERSTAND THE FACTS. YOU SHOULD:

1. CAREFULLY STUDY THE DISCLOSURE STATEMENT, WHICH INCLUDES A SUMMARY RESULT COMPARISON, UNTIL YOU ARE SURE YOU UNDERSTAND FULLY THE EFFECT OF THE TRANSACTION. **THE DISCLOSURE STATEMENT IS REQUIRED TO BE PROVIDED TO YOU NO LATER THAN UPON DELIVERY OF THE POLICY OR CONTRACT.**
2. ASK THE COMPANY, AGENT OR BROKER FROM WHOM YOU BOUGHT YOUR EXISTING LIFE INSURANCE POLICIES OR ANNUITY CONTRACTS TO REVIEW WITH YOU THE TRANSACTION. YOU MAY BE ABLE TO EFFECT THE CHANGES YOU DESIRE MORE ADVANTAGEOUSLY WITH THEM.
3. CONSULT YOUR TAX ADVISOR. THERE MAY BE UNFAVORABLE TAX IMPLICATIONS ASSOCIATED WITH THE CONTEMPLATED CHANGES TO YOUR EXISTING LIFE INSURANCE POLICIES OR ANNUITY CONTRACTS.

As a general rule, it is often not advantageous to drop or change existing coverage in favor of new coverage, whether issued by the same or a different insurance company. Some of the reasons it may be disadvantageous are:

1. The amount of the annual premium under an existing life insurance policy may be lower than that called for by a new life insurance policy having the same or similar benefits. Any replacement of the same type of policy will normally be at a higher premium rate based upon the insured's then attained age.
2. Since the initial costs of a life insurance policy are charged against the cash value increases in the earlier life insurance policy years, the replacement of an old life insurance policy by a new one results in the policyholder sustaining the burden of these costs twice. Annuity contracts usually contain provision for surrender charges, therefore a replacement involving annuity contracts may result in the imposition of surrender charges.
3. The incontestable and suicide clauses begin anew in a new life insurance policy. This could result in a claim being denied under the new life insurance policy that would have been paid under the life insurance policy that was replaced.
4. An existing life insurance policy or annuity contract often has more favorable provisions than a new life insurance policy or annuity contract in areas such as loan interest rate, settlement options, disability benefits and tax treatment.

5. There may have been changes in your health since the purchase of the existing coverage.
6. The insurance company with which you have existing coverage can often make a desired change on terms that would be more favorable than if you replaced existing coverage with new coverage.

YOU HAVE THE RIGHT, WITHIN 60 DAYS FROM THE DATE OF DELIVERY OF A NEW LIFE INSURANCE POLICY OR ANNUITY CONTRACT, TO RETURN IT TO THE INSURER AND RECEIVE AN UNCONDITIONAL FULL REFUND OF ALL PREMIUMS OR CONSIDERATIONS PAID ON IT, OR IN THE CASE OF A VARIABLE OR MARKET VALUE ADJUSTMENT POLICY OR CONTRACT, A PAYMENT OF THE CASH SURRENDER BENEFITS PROVIDED UNDER THE POLICY OR CONTRACT, PLUS THE AMOUNT OF ALL FEES AND OTHER CHARGES DEDUCTED FROM GROSS CONSIDERATIONS OR IMPOSED UNDER THE LIFE INSURANCE POLICY OR ANNUITY CONTRACT, AND MAY HAVE THE RIGHT TO REINSTATE OR RESTORE ANY LIFE INSURANCE POLICIES AND ANNUITY CONTRACTS THAT WERE SURRENDERED, LAPSED OR CHANGED IN THE TRANSACTION TO THEIR FORMER STATUS TO THE EXTENT POSSIBLE AND IN ACCORDANCE WITH THE INSURER'S PUBLISHED REINSTATEMENT RULES TO THE EXTENT SUCH RULES ARE NOT INCONSISTENT WITH THE PROVISIONS OF 11 NYCRR PART 51 (INSURANCE REGULATION 60).

**IMPORTANT:** THIS RIGHT SHOULD NOT BE VIEWED AS REINSTATING OR RESTORING YOUR LIFE INSURANCE POLICY OR ANNUITY CONTRACT TO THE SAME CONDITION AS IF IT HAD NEVER BEEN REPLACED. THERE MAY BE CONSEQUENCES IN REINSTATING OR RESTORING YOUR LIFE INSURANCE POLICY OR ANNUITY CONTRACT, INCLUDING BUT NOT LIMITED TO:

- THE RIGHT TO REINSTATE OR RESTORE YOUR LIFE INSURANCE POLICY OR ANNUITY CONTRACT APPLIES ONLY TO COMPANIES SUBJECT TO NEW YORK INSURANCE LAWS;
- YOUR LIFE INSURANCE POLICY OR ANNUITY CONTRACT IS SUBJECT TO YOUR SPECIFIC COMPANY'S REINSTATEMENT RULES, WHICH MAY VARY FROM COMPANY TO COMPANY. THESE RULES MAY REQUIRE PAYMENT OF BOTH PREMIUM AND INTEREST; HOWEVER, YOU WILL NOT BE SUBJECT TO EVIDENCE OF INSURABILITY, OR A NEW CONTESTABLE OR SUICIDE PERIOD;
- YOU MAY NOT RECEIVE THE INTEREST OR INVESTMENT PERFORMANCE DURING THE PERIOD THE LIFE INSURANCE POLICY OR ANNUITY CONTRACT WAS REPLACED; AND
- THERE MAY BE UNFAVORABLE FEDERAL INCOME TAX CONSEQUENCES AS A RESULT OF THE REINSTATEMENT OF YOUR LIFE INSURANCE POLICY OR ANNUITY CONTRACT.

**IMPORTANT:** IN THE CASE OF A VARIABLE OR MARKET VALUE ADJUSTMENT POLICY OR CONTRACT, THE VALUE OF THE POLICY OR CONTRACT MAY INCREASE OR DECREASE DURING THE 60 DAY PERIOD DEPENDING ON THE PERFORMANCE OF THE UNDERLYING INVESTMENTS, WHICH MAY AFFECT THE VALUE OF THE REFUND YOU RECEIVE.

I HEREBY ACKNOWLEDGE THAT I READ THE ABOVE "IMPORTANT NOTICE" AND HAVE RECEIVED A COPY OF SAME.

## Introduction

### **What is this product?**

**Power Index Premier NY** is a single premium deferred fixed index annuity (index annuity) from The United States Life Insurance Company in the City of New York (we or the company). **This annuity offers interest crediting that is linked to the price changes in the S&P 500<sup>®</sup> Index, the MSCI EAFE Index, and the Russell 2000<sup>®</sup> Index.** These indices are unmanaged and are not available for direct investment. They do not include the dividends paid on the stocks that comprise them, so the dividends paid on the securities underlying the indices are not included in the index return. Over the 10-year period ending December 31, 2023, the annual returns on each of the three indices above (without dividends) were lower by an average of 2.11%, 3.25%, and 1.46%, respectively, compared to the same index with dividends. **If the publication of any of the indices shown in this document are discontinued, or the calculation of any of the indices is changed substantially US Life will adopt a similar index and notify you.**

This annuity has a withdrawal charge. Withdrawals made during the withdrawal charge period could result in your receiving less than the premium paid. Partial withdrawals in excess of allowable amounts can reduce the benefits under the contract.

**Power Index Premier NY** offers an optional guaranteed living benefit (GLB) rider. The optional benefit is designed to provide a guaranteed level of future income for life, even if your contract value goes to zero.

You put money (known as your premium) in one or more index interest account(s). The index interest account(s) can credit interest in a way that gives you some exposure to positive changes in the financial markets while limiting your downside risk. **This annuity does not participate directly in any stock or equity investment.** You can convert your money into a regular stream of income (known as annuitizing).

Details about the interest accounts, GLB riders, withdrawal charges and annuitizing are found later in this document.

### **How does Power Index Premier NY work?**

**Power Index Premier NY** credits interest on the money you put in the index interest accounts. The interest we credit on the index interest accounts is calculated using a number of factors that apply to the performance of the specific index associated with each account. These factors may reduce the index performance percentage that is credited, and are designed to help the company manage the costs of offering the contract. After your contract is issued, we have the flexibility to change the factors on future contract anniversaries. Changes may increase or decrease the interest rate we credit. Please read carefully the definitions of these factors on the next page and ask your financial professional any questions in order to fully understand how each option works and which factors may impact your potential interest earned.

You may receive no interest if the index used to determine interest crediting does not increase, or decreases. Also, any positive change in the index at the end of the index term can be reduced by the factors that apply. You could lose some of the premium you paid if you withdraw money and are charged a withdrawal charge.

#### **Definitions of Terms Introduced**

**Riders/Endorsements:** Additional documents that go with your contract and contain the details about the features and benefits of your contract.

**Tax-deferred interest:** Interest on which no tax is payable until it is withdrawn.

**Withdrawal charge:** A charge that may be assessed against the amount of a withdrawal during the withdrawal charge period.

**Index interest accounts:** Options designed to provide opportunity for growth of your money. They allow potential interest to be added to your contract based on an index (e.g., the S&P 500<sup>®</sup> Index (excluding dividends)) that tracks the performance of financial markets.

**Please see Appendix A for numerical examples that will help you better understand how the Index Interest Accounts work.**

## Your Contract and Interest Crediting Accounts

The following factors work together as explained below to determine interest to be credited to your contract.

- **Index term:** The time period over which the change in the index will be calculated using the factors below. The index term may be one, two or five years depending on what is available to you.
- **Index rate cap:** The maximum rate of interest that can be credited to an index interest account. The index rate cap declared for each index term will never be lower than the stated minimums in your contract. Please see "Your Initial Rate and Rate Changes".
- **Declared index interest percentage:** A rate of interest declared each index term that will be credited to an index interest account when the change in index value over the index term matches or exceeds the minimum change in index value (i.e., when the declared index interest percentage is "triggered" for that index term). The declared index interest percentage applicable for each index term will never be lower than the stated minimum in your contract.

The rates we set vary depending on the index interest account option(s) you choose and may also vary depending on whether you choose a GLB rider.

The contract may provide higher rates on premium amounts of \$100,000 or more than on premium amounts of less than \$100,000.

The amount of interest credited at the end of the index term depends on:

- 1) how the index changes over the term,
- 2) the index interest account(s) utilized,
- 3) applicable index rate caps and/or declared index interest percentages, and
- 4) contract value held in the index interest account(s) at the end of the term.

**The index interest rate will never be less than zero.** If an index interest calculation results in a negative number, no interest would be credited.

**For index interest accounts using cap rates:** You may receive little or no interest if the index used to determine interest crediting doesn't increase, or if it decreases. Also, any positive change in the index at the end of an index term may be reduced by the applicable factors defined above.

**For performance triggered index interest accounts:** If there is any positive change or no change in the applicable index value over the index term, you will earn a rate of interest equal to the declared index interest percentage (i.e., the declared index interest percentage will be "triggered" for that term). Note that if the actual increase in the index is greater than the declared index interest percentage guaranteed for that term, you will still only receive such declared index interest percentage for that term.

**Note for all index interest accounts:** You could lose some of the premium you paid if you withdraw money that is subject to withdrawal charge.

## Your Initial Rates and Rate Changes

You can obtain current and minimum guaranteed rates from your financial professional or the accompanying Current Rates flier, but your actual initial rates will be determined at the time your contract is issued (issue date). At the end of each index term, we may change the rates for the coming term. New rates will be provided to you on the annual statement for your contract and will be guaranteed for the length of the upcoming index term. Factors that influence the declared renewal rates include, but are not limited to, the level of US treasury rates, credit spreads on corporate bonds and other fixed income instruments, company asset-liability matching strategies, the length of the contract withdrawal charge period and the number of years since your annuity contract was issued.

## Where can I put my premium?

Your premium will be allocated to the available index interest account described below and as specified on your application. The index interest account allows interest to be credited at the end of the term based in part on the performance of the associated index.

### Definitions of Terms Introduced on This Page

**Declared:** Current as determined and stated by the insurance company.

<b>Index Interest Account</b>	
<i>Point-to-Point With Rate Cap Index Interest Account</i>	The rate of interest credited will equal the percentage change of the applicable index over the selected index term from one contract anniversary to the contract anniversary at the end of the term, subject to the declared index rate cap.
<i>Point-to-Point with Performance-Triggered Account</i>	The rate of interest credited will equal the declared index interest percentage when the change in index value over the index term is equal to or greater than the minimum change in index value.

**What Indices are available for the Index Interest Account(s)?**

The MSCI EAFE Index, Russell 2000<sup>®</sup> Index, and S&P 500 Index<sup>®</sup> may be available, please check with your financial professional.

Please see important information about the indices in Appendix D.

**Can I transfer / reallocate money between accounts?**

Yes. You can transfer into any of the available accounts on any contract anniversary, but note that if any multi-year term accounts are added, you would only be able to transfer out of those accounts at the end of a term. The minimum transfer amount is \$100. You have 20 days from date of our notification to provide transfer instructions to our Annuity Service Center. The transfer will be effective as of the most recent previous contract anniversary, provided your instructions are received by the 20th day after date of notification.

**How is my contract value calculated?**

When you first purchase your contract, the contract value equals your premium. If you put money in the index interest account(s), we determine whether any interest can be credited to the contract value at the end of the index term, as described earlier, and add it to your contract value if greater than 0%.

If you take a withdrawal, we make a reduction to the contract value for that withdrawal along with any charges that apply, as described in your contract. **No interest is earned on amounts deducted (including charges) from your contract value at any time during the term regardless of how long during the term the money was in the index account prior to the withdrawal.** The reduction to contract value is applied proportionally to the index accounts to which contract value is allocated based on the allocation immediately prior to each partial withdrawal.

**What is the minimum accumulation value (MAV)?**

**Power Index Premier NY** includes a minimum accumulation value which is an amount guaranteed to be available for payment of a death benefit, upon beginning an income plan or when calculating your surrender value upon a total withdrawal. The minimum accumulation value is your premium, accumulated on a daily basis at the minimum growth rate, less reductions for withdrawals taken (including withdrawal charges) as described in your contract. You can obtain the minimum growth rate for currently issued contracts from your financial professional or your rate sheet but your actual minimum growth rate will be determined when your contract is issued, and is guaranteed not to change.

**How do my contract value and my minimum accumulation value interact?**

On the 7th contract anniversary and on every contract anniversary thereafter, the contract value will never be less than the minimum accumulation value as described above. When the minimum accumulation value is greater than the contract value, the contract value will be reset to equal the minimum accumulation value. The company will allocate the amount added to the contract value applicable to this reset proportionally to each index account to which the owner's contract value is allocated. When the contract value is greater than the minimum accumulation value, the minimum accumulation value is reset to equal the contract value.

## Withdrawals and Income

### Can I take withdrawals from my annuity contract?

Yes. You can access your money in one of two ways: withdrawals or annuitization (converting your contract value into a guaranteed stream of income payments).

<b>Withdrawals</b>	<p><b>Withdrawals</b> can be taken at any time (minimum \$1,000 per withdrawal), or you can set up a systematic withdrawal program to receive regular, scheduled amounts (minimum of \$100 per withdrawal). The minimum remaining contract value after any withdrawal must be \$2,500. Here are the three types of <b>penalty-free withdrawals</b> you may make:</p> <ul style="list-style-type: none"> <li>• <b>Penalty-Free withdrawals</b>—After the first contract year, you are allowed to withdraw up to 10% of the contract value as of the preceding contract anniversary, without any withdrawal charges. You may not carry over the unused portion of the penalty-free withdrawal amount to the next contract year .</li> <li>• <b>Penalty-Free withdrawals under the optional guaranteed living benefit (GLB) rider</b>—The GLB rider(s) provide for guaranteed lifetime withdrawals that are not subject to the charges described below if such withdrawals are taken under the terms of the rider. The GLB rider(s) are detailed later in this document.</li> <li>• <b>Penalty-Free withdrawals of required minimum distributions (RMDs)</b> at any time, including the first contract year, that are based solely on your <b>Power Index Premier NY</b> contract value. See further discussion of RMDs below.</li> </ul> <p><i>All withdrawals will reduce your contract value and minimum accumulation value. All withdrawals other than the penalty-free withdrawals described above taken during the withdrawal charge period will be subject to charges. See Appendix B for impact of withdrawals to your contract value and minimum accumulation value.</i></p>
<b>Annuitization/ Income Plan</b>	<p>You can annuitize the contract, also known as beginning an income plan. Beginning an income plan means converting the contract value permanently into a stream of payments. The payments take place over a specific amount of time you choose, with options that guarantee payments for life. Once you begin your income plan, you will not have any further access to your contract value. You or your designated payee will receive your money only via the annuity payments.</p>

### What charges and adjustments might apply to withdrawals?

If you have not elected to begin taking lifetime income withdrawals, a charge may be assessed against the amount of the withdrawal when you take money out of your contract during the withdrawal charge period. The withdrawal charge applies to amounts withdrawn that exceed any penalty-free withdrawals. The percentage charged against the withdrawal amount depends on how long you've had the contract. Once lifetime income withdrawals have begun, there is no withdrawal charge on withdrawals less than or equal to the guaranteed lifetime income amount (GLIA) (and/or the allowable RMD amount, if greater; see RMD discussion below) or after the withdrawal charge period ends.

### Withdrawal Charge Schedule

Contract Year	1	2	3	4	5	6	7	8+
Withdrawal Charge	9%	8%	7%	6%	5%	4%	3%	0%

### What is the impact of withdrawal charges on IRS mandated Required Minimum Distributions?

If you purchase your annuity under a tax-qualified retirement plan (e.g., an IRA), the Internal Revenue Code (IRC) directs that a minimum amount of retirement income must be taken each year beginning in the year the owner attains RMD age. The RMD age varies according to birthdate as follows: generally, income must begin by April 1 of the year after the owner reaches 70½ (if you were born before July 1, 1949); or age 72 (if you were born after June 30, 1949 and before January 1, 1951); or age 73 if you were born January 1, 1951 or later) unless RMD requirements are being satisfied elsewhere. Note that for those born January 1, 1951 or later, the RMD eligible age is due to increase to age 75 after December 31, 2032.

#### Definitions of Terms Introduced on This Page

**Contract year:** The year between one contract anniversary and the next.

- Withdrawal charges will not apply to RMD amounts that are based solely on your **Power Index Premier NY** contract value (not in combination with other IRAs) at any time after issue, including the first contract year.
- The minimum partial withdrawal amount of \$1,000 outlined above does not apply to RMDs.
- RMD amounts do count as part of the 10% penalty-free withdrawal amount, thereby reducing or possibly eliminating the ability to take other penalty-free withdrawals within a contract year.
- Failure to satisfy the RMD requirements may result in a tax penalty. You should consult your tax advisor for more information.
- If you are transferring from another company and have already reached your RMD age, you should take the current tax year's RMD prior to the transfer, since we do not have access to information from the other company needed to calculate your current year's RMD.

**How is my contract value calculated if I want to withdraw all my money (i.e., surrender the contract)?**

If you withdraw all your money from the contract, you will receive the cash surrender value, and your contract terminates. Upon surrender, you will receive an amount that is equal to the greater of:

- the contract value less applicable withdrawal charge or
- the minimum accumulation value as described above, reduced by the following amount:

Withdrawal Charge Percentage x (Minimum Accumulation Value - Penalty Free Withdrawal)

**When can I begin an income plan?**

You may begin an income plan, also known as annuitizing, after the first thirteen months but no later than the contract's maturity date. The maturity date is the owner's or, if jointly owned, the older owner's 95th birthday. Payments automatically begin on the maturity date unless you surrender the contract on or before that date. The amount that is used to determine your income payments is generally your contract value, including any partial index interest through the date the income plan begins. The amount on which your payments are based will never be less than the minimum accumulation value. You cannot annuitize only a portion of your contract value; payments must be based on the entire contract value as adjusted for any applicable charges, or on the alternative minimum accumulation value. Once you begin your income plan, the death benefit will terminate. Please see "Additional Information about the Contract."

If you plan to annuitize your contract in the first five years, you should consider whether a different annuity contract is more appropriate for you.

If you plan to annuitize your contract in the first five years, you should consider whether or not electing a GLB rider is more appropriate for you.

**What income plans are available with my contract?**

You have five income plan options. Payments may be set up under one of these options or under another plan mutually agreeable to you and the company. If a life income option is chosen, the specific amount of the payments is determined based on:

- the greater of contract value or minimum accumulation value
- the age of the annuitant (the person on whose life expectancy the contract is based—generally, the owner); and
- the gender of the annuitant.

<b>Life Income</b>	Pays income for as long as the annuitant lives.
<b>Joint and Survivor Life Income</b>	Pays income until both the annuitant and a designated second person have died.
<b>Joint and Survivor Life Income with 10 or 20 Years Guaranteed</b>	Pays income until both the annuitant and a designated second person have died, unless they die before the guaranteed annuity income payments have been made. In that case, income payments will continue to the beneficiary for the rest of the guaranteed 10 or 20 years.
<b>Life Income with 10 or 20 Years Guaranteed</b>	Pays income for as long as the annuitant lives. If the annuitant dies before the guaranteed annuity income payments have been made, the income payments will continue to the beneficiary for the rest of the guaranteed 10 or 20 years.
<b>Period Certain</b>	Pays income for a specified period of years from 5 to 30 years.

If you do not choose an income plan option listed above, you will be defaulted to the income plan provided for under your contract. Not all annuity options may be available for IRA owners.

**Can I access my money if I have a serious illness, without paying a withdrawal charge?**

The following riders let you make withdrawals without a withdrawal charge when specific conditions are met. There is no charge for these riders. If you choose to take a withdrawal under these riders, they may reduce benefits under the GLB feature. Details about utilizing the riders, including qualifying conditions and waiting periods, are set forth in the riders.

<b>Extended Care Rider</b>	The owner must receive Extended Care for at least 90 consecutive days, beginning after the second contract year. The rider terminates when the owner turns age 86.
<b>Terminal Illness Rider</b>	The owner must be initially diagnosed with a Terminal Illness on or after the contract issue date. Only one partial or full withdrawal is permitted.

**Guaranteed Living Benefit Rider**

**Lifetime Income Builder**

**Is the Guaranteed Living Benefit optional?**

Yes. You may elect the GLB on your application when you purchase the contract. Keep in mind that choosing the lifetime income builder guaranteed living benefit (GLB) rider may impact the rates on the index interest account you use.

**What benefits do the GLB riders provide?**

The rider provides an annual guaranteed lifetime income amount (GLIA) that can be taken in a stream of withdrawals over your lifetime. The GLIA is the maximum amount that may be withdrawn each contract year under the GLB rider.

The GLIA is based on the greater of your contract value or minimum accumulation value when you begin income, multiplied by the applicable income percentage. Your initial income percentage grows by a set income percentage increase until you elect to begin lifetime income withdrawals or your contract's 15<sup>th</sup> anniversary, whichever comes first. Even if GLIA withdrawals reduce your contract value to zero, GLIA payments will continue as long as you live or, if joint coverage is elected, as long as either of you live.

Taking a GLIA withdrawal is the same as taking any other withdrawal – it will reduce your contract value, cash surrender value and death benefit available under your contract.

Note: If this annuity is an IRA and you have elected the GLB rider, the benefit may have limited usefulness if you take partial withdrawals to satisfy RMDs prior to activating the GLIA withdrawal. Such pre-activation RMDs might result in a proportional reduction in the GLIA or an inability to exercise the benefit altogether.

**What does a GLB rider cost?**

There is no fee or charge for the GLB rider.

**How do I begin my GLIA withdrawals?**

You may elect to begin receiving GLIA withdrawals at any time after your contract is issued. You must submit a withdrawal form to the company to request lifetime income withdrawals. Note: once you make your election, the income percentage used to calculate your GLIA is set and your GLIA will no longer increase, even if you decide not to take withdrawals every year.

**How much can I receive each year through Lifetime Income withdrawals under the GLB rider?**

The rider guarantees a specific amount to be available each year for the remainder of your life (or the lives of you and your spouse if joint coverage is elected) so long as all withdrawals stay within the terms of the rider. This amount is your GLIA.

Your GLIA is determined at the time you begin lifetime income withdrawals. To calculate the GLIA, we multiply the greater of your contract value or the minimum accumulation value by the applicable income percentage as of the date of your first income withdrawal. The initial percentage is determined on the date of purchase. It is based on your age (or the age of the younger of you and you jointly covered spouse) on the contract issue date and whether you elect single or joint coverage. You can obtain the current income percentages from your financial professional or accompanying GLB Rate Sheet, but your actual initial income percentage will be determined on the contract issue date and will be set forth on the rider data page.

Your income percentage will be adjusted upward by a set percentage every year you wait to begin lifetime income withdrawals for up to fifteen years. Your income percentage increase will be set forth on the rider data page. Ask your financial professional for the current income percentage increase. Once you begin lifetime increase withdrawals under the rider, the GLIA will be calculated as described above and will no longer increase. Note: Income

percentages and the income percentage increase relate only to your GLIA and are not rates of return added to your contract value. After beginning lifetime income withdrawals, the GLIA will not decline as long as you take withdrawals within the terms of the rider (including certain RMD withdrawals discussed below). For example, withdrawals up to the GLIA will not incur withdrawal charges, even if they exceed the penalty-free withdrawal amount under the contract. However, the GLIA could decrease if you make an excess withdrawal.

***What are excess withdrawals and how do they impact the GLB rider?***

After you elect to begin lifetime income withdrawals under the GLB rider: When you elect to begin lifetime income withdrawals, your income percentage and GLIA will no longer be adjusted upward by income percentage increases. However, the GLIA may be decreased by excess withdrawals. If any portion of a withdrawal exceeds the GLIA (except for certain RMD withdrawals described below), the amount in excess of the GLIA will be considered an excess withdrawal. This excess withdrawal will permanently reduce the GLIA available for future years in the same proportion that the excess withdrawal reduces the greater of contract value or minimum accumulation value. An excess withdrawal that reduces your contract value to zero at any time will terminate the GLB rider and the contract.

Before you elect to begin lifetime income withdrawals under the GLB rider: Withdrawals taken before you elect to begin income (including RMDs) are not considered excess withdrawals under the GLB rider; they will, however, reduce the contract value and minimum accumulation value, the greater of which is used to calculate your GLIA, when you begin your lifetime income withdrawals. As stated above, beginning RMDs before you activate lifetime income withdrawals can limit the usefulness of the GLB rider.

**Please see Guaranteed Lifetime Withdrawal examples in Appendix C.**

***If I own this contract within a retirement plan or if it is a tax-qualified contract such as an IRA, how do Required Minimum Distributions (RMDs) impact my guaranteed lifetime income withdrawals?***

In any year that RMDs are taken before lifetime income withdrawals begin, they will not be considered excess withdrawals, but they will reduce your contract value and minimum accumulation value (which is used to calculate your GLIA at the time of income election). Once you elect to begin lifetime income withdrawals, RMDs from this contract in any single year will not be treated as excess withdrawals, even if they exceed the GLIA. If you must take RMDs from this contract after lifetime income activation and want to ensure that these withdrawals are not considered excess withdrawals, your total distribution(s) during the current contract year must not exceed the greater of the GLIA or the RMD amount as calculated by our Annuity Service Center. If you are transferring from another company and are already 73 (age 72 if you were born after June 30, 1949 and before January 1, 1951; age 70½ if you were born before July 1, 1949), you should take the current tax year's RMD prior to the transfer since we are unable to calculate RMDs for products issued by other carriers for which we do not have access to pertinent information.

***What happens to the GLB rider upon my death?***

There are certain options described below which, pursuant to federal tax law, are available only to spousal beneficiaries. For joint owners, your spouse is automatically your sole primary beneficiary. Single owner contracts must designate the spouse as sole primary beneficiary in order to take advantage of these options. Single owners should read the following information very carefully before naming a beneficiary other than their spouse.

Single Covered Person: Single or jointly owned contracts may cover a single life (single covered person) under the GLB rider.

- Under single owned contracts, the contract and the rider will terminate and no further lifetime income withdrawals will be made (or begun) upon the death of the single covered person (who is also the owner).
- Under jointly owned contracts, the older joint owner must be the single covered person and the joint owners must be spouses and each other's sole primary beneficiary. A surviving single covered person may continue the contract and the rider: if lifetime income withdrawals have begun, they may continue; if they have not begun, the surviving single covered person/spouse may elect to begin them at any time. Rider benefits will cease, however, upon the death of the single covered person. The surviving spouse may continue the contract but the rider and all lifetime income payments will be terminated.

Joint Covered Person: Single or jointly owned contracts also cover both spouses (joint covered persons) under the GLB rider.

- Under jointly owned contract, the joint owners must be spouses, the joint covered persons and each other's sole primary beneficiary. A surviving spouse may choose to continue the contract and the rider: if lifetime income withdrawals have begun, they may continue; if they have not begun, the surviving spouse may elect to begin them at any time. Alternatively, the surviving spouse may choose to receive any contractual death benefit. However, choosing the death benefit will terminate the contract as well as the GLB rider and any lifetime income benefits.

- Under single owned contracts, the joint covered persons must be spouse, and the owner's spouse must be the sole primary beneficiary. Upon the death of the owner, if the contract value is greater than zero, the surviving spouse will have the same options described immediately above.

***What happens to the GLB rider upon the maturity date?***

The maturity date is the 95<sup>th</sup> birthday of the owner (or older joint owner). If the contract value is greater than zero on the maturity date, you must select one of the following options:

- 1) Continue or Begin Lifetime Income. If you have previously started lifetime income, your income will continue as GLB Annuitization payments described below. If you have not previously begun lifetime income, you will begin receiving income as GLB Annuitization payments. GLB Annuitization provides for the payment of your GLIA for a fixed period. The fixed period is determined by dividing the contract value on the maturity date by the GLIA. After that fixed period ends, you will continue to receive the GLIA for the remaining lifetime(s) of the covered person(s), even after the contract value is reduced to zero. If you die during the fixed period, payments will continue to your beneficiary during the remainder of the fixed period; or
- 2) Annuitization. Elect an Income Payment Option under the annuitization provisions of the contract; or
- 3) Surrender the contract.

If you do not select an option by the maturity date, we will begin a GLB Annuitization Income Plan in accordance with option (1) above.

***Are there circumstances under which the GLB rider will be terminated?***

The GLB rider will be terminated upon the occurrence of any one of the following:

- Death of the covered person, or if there were two covered persons, upon the death of the surviving spouse
- Payment of a death benefit
- Full surrender of the contract or beginning of an income plan (annuitization)
- Reduction of the contract value to zero due to an excess withdrawal
- The occurrence of any ownership change that removes all covered persons from the contract

**Additional Information about the Contract**

***The Contract***

- The contract is designed to help people meet long-term financial goals. It's available to people aged 85 and younger, age 50 to 80 if a GLB rider is elected.
- Please see the contract, including each rider and endorsement attached to it, for a complete description of the benefits and restrictions associated with the contract.
- The language in this document provides the description of the general product features available on the annuity contract that you are considering. Some product features and terms may not be available in all states and may differ or be restricted by the selling firm through which this product is offered. Examples of terms and features that may differ from what is stated in this document include, but are not limited to: rates, minimum premium, minimum/maximum issue age and available crediting strategies. Please check with your financial professional regarding any variations or restrictions that may apply.
- **Right to Examine the contract:** The contract may be returned to us or your financial professional within 20 days for non-replacements; 60 days for replacements after delivery if you are not satisfied with it for any reason. We will return your premium minus any withdrawals.

***What happens upon my death?***

If the contract value or the minimum accumulation value is greater than zero, the beneficiary will receive a death benefit, which is an amount paid when you, as the owner, die. As an alternative, a spouse beneficiary can decide to continue the contract (spousal continuation) as the contract owner, in which case the death benefit will be paid upon the second owner's death. If your contract is jointly owned, you and the joint owner (joint annuitant if non-natural ownership) are each other's primary beneficiary. Any other beneficiary designation will be treated as a contingent beneficiary. A death benefit is not subject to withdrawal charges. The death benefit will equal the greater of:

- a) the contract value, OR
- b) the minimum accumulation value as described above.

The contract value calculation includes any index interest up to the date we receive required documentation for the death claim.

Beneficiaries can annuitize the contract within one year or take a lump sum within 5 years of death of owner. If you die after an income plan has begun, payments based on the lifetime of the owner will end unless the selected option includes a specified number of guaranteed years.

For qualified contracts, death benefit options may be limited for non-spousal or other certain beneficiaries.

### ***Can I own the contract along with someone else?***

Yes. The company allows this contract to be owned by two people (jointly owned) if they are spouses (as determined for federal tax law purposes). The age of the older owner is used to determine the availability of most age-driven benefits. If your contract is jointly owned, the joint owner is the sole beneficiary. Joint annuitants, if any, when the owner is a non-natural person shall be each other's sole beneficiary, except when the owner is a charitable remainder trust. Any other beneficiary designation will be treated as a contingent beneficiary.

## **Other Information You Should Know**

### ***Commissions and/or Compensation to Financial Professionals and Selling Agencies***

We pay commissions to financial professionals and their selling firms and/or independent marketing organizations for the sale of the contract. Commissions are not deducted from your contract value. Instead, we pay commissions from company assets. Commission rates vary depending upon the agreements we have with a particular financial professional, selling firm and/or independent marketing organization. Product rates and features may be more or less favorable, depending on these compensation arrangements. In addition, some selling firms or independent marketing organizations may offer additional incentives to financial professionals as a reward for achieving certain goals, attaining specific sales volume levels, etc. You should discuss with your financial professional how they are compensated for sales of a contract and/or whether the compensation presents any real or perceived conflicts of interest. You may wish to take such compensation into account when considering or evaluating any recommendation relating to this contract.

### ***Index Substitution***

We may substitute an alternative index or discontinue an index interest account under certain circumstances. We will provide you a written notice before we substitute an alternative index or an index interest account is terminated and will explain your options. We will ensure that at least one index interest account is available under the contract at all times.

### ***Taxes***

This discussion regarding the tax treatment of an annuity contract or retirement plan and program is intended for general purposes only. It is not tax advice, either general or individualized. You should not interpret this discussion to provide any predictions or guarantees of a particular tax treatment. The information provided here is generally based upon the company's understanding of current tax rules and interpretations. Tax laws are subject to change, and while many such changes will only apply going forward, you should recognize that a change could have retroactive effect as well. Neither USL nor its agents or representatives are authorized to give legal, tax or accounting advice. You should seek competent tax or legal advice, as you deem necessary or appropriate, regarding your own circumstances. The company does not guarantee the tax status or treatment of your annuity.

This single premium income product may not be appropriate for use with contributory IRAs (IRA, ROTH, SEP) if you plan to make ongoing contributions. Contracts in retirement plans and accounts such as IRAs, 401(k)s, 403(b)s, etc.,

are tax deferred regardless of whether or not they are funded with an annuity. If you are considering funding a tax-qualified retirement plan with an annuity, you should know that an annuity does not provide any additional tax-deferred treatment of interest beyond the treatment by the tax-qualified retirement plan itself. However, annuities do provide other features and benefits such as income options and optional guaranteed benefits.

***How Withdrawals Are Taxed***

Annuities are tax-deferred, which means you or your beneficiary don't pay taxes on the interest credited until the money is paid to you or, in the case of a death benefit, to a beneficiary. If a non-natural person, e.g. a corporation, partnership, or other entity, is the owner of the deferred annuity, the annual growth is taxable unless the entity is acting as the agent of a natural person. When you receive a payout or take a withdrawal (including withdrawals under a GLB rider), you pay ordinary income taxes on the taxable amount, including any interest earned. If you take withdrawals before age 59½, an additional 10% federal tax may apply. Effective January 1, 2013, certain contract owners may be subject to an additional net investment income tax (NIIT) on income received from non-qualified annuities. Distributions from certain retirement plans (such as traditional and Roth IRAs) are generally not subject to NIIT. You should consult your tax advisors regarding your specific situation.

If you **annuitize** your non-qualified contract, a portion of each annuity income payment will be considered, for tax purposes, to be a return of a portion of your premium, generally until you have received your entire premium. Any portion of each annuity income payment that is considered a return of your premium will not be taxable. Once the investment in the contract (or premium) is exhausted, all future payments will be fully taxable.

Generally, 100% of payments received, whether through withdrawals or annuitization, from a contract held within a retirement plan or account such as an IRA or 401(k) will be taxable. Amounts received from a contract held as a ROTH IRA will generally not be taxable. Certain limitations may apply.

***What if I want to exchange one annuity for another?***

Under IRC 1035, generally you can exchange one tax-deferred annuity contract for another in its entirety without paying taxes on the credited interest at the time of the exchange, provided no other property or money is distributed as part of the exchange. Special rules and procedures apply to IRC Section 1035 exchanges. Partial exchanges of annuity contracts are subject to different rules. Please consult your tax advisor. Before you exchange one contract for another, we recommend you compare the benefits, features, and costs of the two annuity contracts. For **Power Index Premier NY**, you pay a withdrawal charge if you undertake a 1035 exchange during the first 7 contract years.

## Appendix A: Index Interest Account Numerical Examples

All rates used in examples are hypothetical and do not represent any specific contract.

### **General Assumptions**

- \$10,000 is the contract value in the Index Interest Account being considered for interest crediting at the end of the index term
- No withdrawals have been taken
- Beginning index value: 1,000

### **Example 1: Point-to-Point with Index Rate Cap Index Interest Account**

#### **Additional Assumptions**

- Ending index value (after the applicable index term): 1,060
- Index rate cap: 2.50%

#### **Calculations**

- (a)  $(1,060 \text{ ending index value} / 1,000 \text{ beginning index value}) - 1 = 6\%$  index value change
- (b) Lesser of **6%** index value change or **2.50%** index rate cap = **2.50%** index interest credited rate
- (c) Index interest credited to the index interest account =  **$\$10,000 \times 2.50\% = \$250$**

### **Example 2: Point-to-Point with Performance Triggered Index Interest Account**

#### **Additional Assumptions**

- Ending index value (after the applicable index term): 1,010
- Minimum change in index value: 0%
- Declared index interest percentage: 5.00%

#### **Calculations**

- (a)  $(1,010 \text{ ending index value} / 1,000 \text{ beginning index}) - 1 = 1\%$  index value change
- (b) **1%** change in index value exceeds the minimum change in index value of **0%**, therefore trigger requirement is met and declared rate is credited
- (c) Index interest credited to the index interest account =  **$\$10,000 \times 5.00\% = \$500$**

## **Appendix B: Withdrawal Examples**

Partial Withdrawals reduce the Contract Value and the Minimum Accumulation Value on the date of each withdrawal. The reduction of Contract Value is applied proportionally to the index accounts to which Contract Value is allocated based on allocation immediately prior to each partial withdrawal. The reduction for each withdrawal is determined based on the following:

- 1) the greater of the Contract Value or the Minimum Accumulation Value will be reduced by the amount of the withdrawal (dollar-for-dollar); and
- 2) the lesser of the Contract Value or the Minimum Accumulation Value will be reduced by an amount based on the proportion by which the greater value is reduced by the partial withdrawal described in 1.) above.

### **Example 1: Minimum Accumulation Value less than Contract Value**

**Contract Value = \$100,000**

**Minimum Accumulation Value = \$95,000**

**Partial withdrawal = \$10,000**

- The Contract Value is greater value and is reduced by the amount of the withdrawal of \$10,000.
- The Minimum Accumulation Value is the lesser value and is reduced by the proportion that the partial withdrawal represents of the Contract Value which is  $\$10,000/\$100,000$  or 10%.
- The resulting Contract Value after the partial withdrawal is: \$90,000 ( $\$100,000 - \$10,000$ ).
- The reduction to Minimum Accumulation Value is 10% of \$95,000 which equals a reduction of \$9,500.
- The resulting Minimum Accumulation Value after the withdrawal is \$85,500 ( $\$95,000 - \$9,500$ ).

### **Example 2: Minimum Accumulation Value greater than Contract Value**

**Contract Value = \$100,000**

**Minimum Accumulation Value = \$110,000**

**Partial withdrawal = \$11,000**

- The Minimum Accumulation Value is greater value and is reduced by the amount of the withdrawal of \$11,000.
- The lesser value of Contract Value and is reduced by the proportion that the partial withdrawal represents of the Minimum Accumulation Value which is  $\$11,000/\$110,000$  or 10%.
- The resulting Minimum Accumulation Value after the partial withdrawal is: \$99,000 ( $\$110,000 - \$11,000$ ).
- The reduction to Contract Value is 10% of \$100,000 which equals a reduction of \$10,000.
- The resulting Contract Value after the withdrawal is \$90,000 ( $\$100,000 - \$10,000$ ).

## Appendix C: Guaranteed Living Benefit Rider Examples

### Example 1: Calculation of the Guaranteed Lifetime Income Amount (GLIA)

Here's how we determine the guaranteed lifetime income amount. The example is hypothetical and does not represent any specific contract.

#### Assumptions

- \$100,000 single premium received during first 60 days
- Issue age 65
- Lifetime income activation in 5 years at age 70
- Lifetime income percentage: 5.50% (based on your age at issue)
- Income percentage increase: 0.25%
- Assumed Annual Credited Rate: 1.50%
- Minimum Growth Rate: 1.00%
- No withdrawals prior to beginning lifetime income withdrawals

*Income percentages and income percentage increases are periodically set by the company and may differ from what is assumed in this example. Please ask your financial professional for the current income percentages and income percentage increase.*

**Step 1:** Calculate the Income Percentage based on the desired income election age. Remember:

- We take the initial income percentage at issue (5.50%)
- And apply the income percentage increase of 0.25% for each year you defer income, up to income activation or 15 years.

**Income percentage at attained age 70 = 5.50% (based on age at issue of 65) + (5 x 0.25%) = 6.75%**

**Step 2:** The contract value and the minimum accumulation value at the end of policy year 5, including interest credited and assuming no prior withdrawals is equal to:

**Contract Value = \$100,000 + \$7,728.40 = \$107,728.40**

**Minimum Accumulation Value = \$100,000 + \$5,101.01 = \$105,101.01**

**Step 3:** When you elect to begin lifetime income withdrawals, we determine the total GLIA, or amount available each year, by multiplying the greater of your contract value or minimum accumulation value by the applicable income percentage, which has been adjusted upward each year by the income percentage increase for the number of years that withdrawals were deferred. In this example, withdrawals were deferred for 5 years, so the final GLIA is calculated as shown below:

**GLIA at age 70 = max (contract value, minimum accumulation value) x attained age income percentage = \$107,728.40 x 6.75% = \$7,271.67**

***The amount available for withdrawal each year for the rest of your life under this hypothetical example would be \$7,271.67 as long as you did not take any excess withdrawals.***

### Example 2: Impact of Excess Withdrawals

The example below is based on the same assumptions shown in the previous example but also shows the impact that an excess withdrawal of 10% of the greater of contract value and the minimum accumulation value at the beginning of year 6 would have on the GLIA.

The following table shows the contract value, the minimum accumulation value, and the GLIA:

- at the beginning of year 6 before the annual GLIA withdrawal and before the 10% excess withdrawal,
- the contract value, the minimum accumulation value, and the GLIA after the GLIA is withdrawn; and
- the contract value, the minimum accumulation value, and the new GLIA after the 10% excess withdrawal

This example also assumes you took the annual GLIA of \$7,271.67 at the beginning of year 6 and then a subsequent 10% excess withdrawal after the GLIA is withdrawn.

<b>Contract Year</b>	<b>Contract Value</b>	<b>Minimum Accumulation Value</b>	<b>GLIA</b>
Beginning of year 6 (before GLIA withdrawal and before 10% excess withdrawal)	\$107,728.40	\$105,101.01	\$7,271.67
Beginning of year 6 (after GLIA withdrawal and before 10% excess withdrawal)	\$100,456.73	\$98,006.69	\$7,271.67
Beginning of year 6 (after GLIA withdrawal and 10% excess withdrawal)	\$90,411.06	\$88,206.02	\$6,544.50*

\*New GLIA amount as a result of the reduction due to the 10% excess withdrawal.

**This example shows that as a result of a single 10% excess withdrawal, your new GLIA available for withdrawal each year would be reduced to \$6,544.50, a 10% decrease from the original amount of \$7,271.67.**
